

- The deposited check was paid by the paying bank.

However, the depository bank may assess an overdraft or returned check fee if it includes a notice concerning overdraft and returned check fees with the disclosure required in §229.16(c)(2) and, when required, refunds any such fees upon the request of the customer. The overdraft and returned check notice must state that the customer may be entitled to a refund of overdraft or returned check fees that are assessed if the check subject to the delay is paid, and state how to obtain a refund.

### ***Credit Union Notice of Interest Payment Policy***

Under §229.16(d), if a credit union begins to accrue interest or dividends on all deposits made in an interest-bearing account, including cash deposits, at a later time than the day specified in §229.14(a), the institution's specific policy disclosures must contain an explanation of when interest or dividends on deposited funds will begin to accrue.

### **Initial Disclosures – §229.17**

#### ***New Accounts***

Section 229.17(a) states a bank must provide potential customers with the disclosures described in §229.16 before an account is opened.

### **Additional Disclosure Requirements – §229.18**

#### ***Deposit Slips***

Under §229.18(a), all preprinted deposit slips given to customers must include a notice that deposits may not be available for immediate withdrawal.

#### ***Location Where Employees Accept Consumer Deposits***

Section 229.18(b) provides that a bank must post, at a conspicuous place at each location where its employees receive deposits to consumer accounts, a notice that sets forth the time periods applicable to the availability of funds deposited.

#### ***Automated Teller Machines***

Under §229.18(c), a depository bank must post or provide a notice at each ATM location that funds deposited in the ATM may not be available for immediate withdrawal. A depository bank that operates an off-premises ATM from which deposits are removed not more than two times each week, as described in §229.19(a)(4), must disclose at or on the ATM the days in which deposits made at the ATM will be considered received.

#### ***Upon Request***

Section 229.18(d) states a bank must provide a copy of its specific availability policy disclosure described in §229.16 to any person who requests it.

### ***Changes in Policy***

Thirty days prior to implementation, a bank must send notification of a change to the bank's availability policy to all account holders, if adversely affected by the change. Under §229.18(e), changes that result in faster availability may be disclosed no later than 30 days after implementation.

### **Miscellaneous – §229.19**

#### ***When Funds are Considered Deposited***

Section 229.19(a) provides rules that govern when funds are considered deposited for purposes of Subpart B of the regulation. The time that funds must be made available for withdrawal is measured from the day the deposit is "received." Funds received at a staffed teller station or ATM are considered deposited when received by the teller or placed in the ATM. Funds mailed to the depository bank are considered deposited on the banking day they are received by the depository bank. The funds are received by the depository bank at the time the mail is delivered to the bank, even if the mail is initially delivered to a mail room, rather than the check processing area.

Funds, however, may also be deposited at an unstaffed facility such as a night depository or lock box. Funds deposited at a night depository are considered deposited on the banking day the deposit is removed, and the contents of the deposit are accessible to the depository bank for processing. For example, some businesses deposit their funds in a locked bag at the night depository late in the evening and return to the bank the following day to open the bag. Other depositors may have an agreement with their bank that the deposit bag must be opened under the dual control of the bank and the depositor. In these cases, the funds are considered deposited when the customer returns to the bank and opens the deposit bag.

Funds deposited through a lock box arrangement are considered deposited on the day the deposit is removed from the lock box and are accessible to the depository bank for processing. A lock box is typically used by a corporation for the collection of bill payments or other check receipts.

The regulation contains a special rule for off-premise ATMs that are not serviced daily. Funds deposited at these ATMs are considered deposited on the day they are removed from the ATM, if the ATM is not serviced more than two times each week. This special provision is geared toward those banks whose practice is to service remote ATMs infrequently. If a depository bank uses this provision, it must post a notice at the ATM informing depositors that funds deposited at the ATM may not be considered received on the date of deposit.

Funds deposited on a day the depository bank is closed, or after the bank's cut-off hour, may be considered made on the next banking day. Generally, a bank may establish a cut-off

hour of 2:00 p.m. or later for receipt of deposits at its main office or branch offices. A cut-off hour of 12:00 noon or later may be established for deposits made to ATMs, lock boxes, night depositories, or other off-premises facilities. (As specified in the commentary to §229.19(a), the noon cut-off period relates to the local time of the branch or other location of the depository bank where the account is maintained or the local time of the ATM or off-premise facility).

Different cut-off hours may be established for different types of deposits. For example, a 2:00 p.m. cut-off for receipt of check deposits and a later time for receipt of wire transfers is permissible. Location can also play a role in the establishment of cut-off hours. For example, a different cut-off hour may be established for ATM deposits than for over-the-counter deposits, or for different teller stations at the same branch. With the exception of the 12:00 noon cut-off hour for deposits at ATMs and off-premise facilities, no cut-off hour for receipt of deposits can be established earlier than 2:00 p.m.

#### ***When Funds Must Be Made Available***

Section 229.19(b) discusses funds availability at the start of a business day. Generally, funds must be available for withdrawal by the later of 9:00 a.m. or the time a depository bank's teller facilities including ATMs are available for customer account withdrawals. (Under certain circumstances, there is a special exception for cash withdrawals—see §229.12(d)). Thus, if a bank has no ATMs and its branch facilities are available for customer transactions beginning at 10:00 a.m., funds must be available for withdrawal by 10:00 a.m. If a bank has 24 hour ATM service, funds must be available by 9:00 a.m. for ATM withdrawals.

The start of business is determined by the local time where the branch or depository bank holding the account is located. For example, if funds in an account at a west coast bank are first made available at the start of business on a given day, and a customer attempts to withdraw the funds at an east coast ATM, the depository bank is not required to make funds available until 9:00 a.m. west coast time (12:00 noon east coast time).

#### ***Effects of the Regulation on Policies***

Section 229.19(c) describes the effects of the regulation on the policies of a depository bank. Essentially, a depository bank is permitted to provide availability to its customers in a shorter time than that prescribed in the regulation. It may also adopt different funds availability policies for different segments of its customer base, as long as each policy meets the schedules in the regulation. For example, it may differentiate between its corporate and consumer customers, or may adopt different policies for its consumer customers based on whether a customer has an overdraft line of credit associated with the account.

The regulation does not affect a depository bank's right to accept or reject a check for deposit, to charge back the customer's account based on a returned check or notice of nonpayment, or to claim a refund for any credit provided to the customer.

Nothing in the regulation requires a depository bank to have its facilities open for customers to make withdrawals at specific times or on specific days. For example, even though the special cash withdrawal rule set forth in §229.12(d) states that a bank must make up to \$400 available for cash withdrawals no later than 5:00 p.m. on specific business days, if a bank does not participate in an ATM system and does not have any teller windows open at or after 5:00 p.m., the bank need not join an ATM system or keep offices open. In this case, the bank complies with this rule if the funds that are required to be available for cash withdrawal at 5:00 p.m. on a particular day are available for withdrawal at the start of business on the following day. Similarly, if a depository bank is closed for customer transactions, including ATMs, on a day funds must be made available for withdrawal, the regulation does not require the bank to open.

If a bank has a policy of limiting cash withdrawals at ATMs to \$250 per day, the regulation would not require that the bank disburse \$400 of the proceeds of the customer's deposit that must be made available for cash withdrawal on that day.

Some small financial institutions do not keep cash on their premises and offer no cash withdrawal capability to their customers. Others limit the amount of cash on-premises for bonding purposes, and reserve the right to limit the amount of cash that a customer can withdraw on a given day, or require advance notice for large cash withdrawals. Nothing in the regulation is intended to prohibit these practices if they are applied uniformly and are based on security, operating, or bonding requirements, and are not dependent upon the length of time the funds have been in the customer's account, as long as the permissible hold has expired. The regulation, however, does not authorize such policies if they are otherwise prohibited by statutory, regulatory, or common law.

#### ***Calculated Availability for Nonconsumer Accounts***

Section 229.19(d) contains the rules for using calculated availability on nonconsumer accounts. Under calculated availability, a specified percentage of funds from check deposits may be made available to the customer on the next business day, with the remaining percentage deferred until subsequent days. The determination of the percentage of deposited funds that will be made available each day is based on the customer's typical deposit mix as determined by a sample of the customer's deposits. Use of calculated availability is permitted only if, on average, the availability

terms that result from the sample are equivalent or more prompt than the requirements of this regulation.

### ***Holds on Other Funds***

Section 229.19(e) clarifies that, if a customer deposits a check, the bank may place a hold on any of the customer's funds to the extent that the funds held do not exceed the amount of the check deposited, and the total amount of funds held are made available for withdrawal within the times required in this regulation. For example, if a customer cashes a check (other than an "on us" check) over-the-counter, the depository bank may place a hold on any of the customer's funds to the extent that the funds held do not exceed the amount of the cashed check.

### ***Employee Training and Compliance***

Section 229.19(f) contains the requirements for employee training and compliance. The EFA Act requires banks to inform each employee who performs duties subject to the Act about its requirements. The EFA Act and Regulation CC also require banks to establish and maintain procedures designed to ensure and monitor employee compliance with such requirements.

### ***Effects of Mergers***

Section 229.19(g) explains the effect of a merger transaction. Merged banks may be treated as separate banks for a period of up to one year after consummation of the merger transaction. However, a customer of any bank that is a party to the merger transaction, and has an established account with the merging bank, may not be treated as a new account holder under the new account exception of §229.13(a). A deposit in any branch of the merged bank is considered deposited in the bank for purposes of the availability schedules in accordance with §220.19(a). This rule affects the status of the combined entity in a number of areas. For example:

- When the resulting bank is a "participant" in a check clearinghouse association;
- When an ATM is a "proprietary ATM"; and
- When a check is drawn on a branch of the depository bank.

## **Relation to State Law – §229.20**

### ***General Rule***

Section 229.20(a) contains the general rule as to how Regulation CC relates to state laws addressing expedited funds availability.

If a state has a shorter hold for a certain category of checks than is provided for under federal law, that state requirement will supersede the federal provision. For example, most state laws base some hold periods on whether the check deposited is drawn on an in-state or out-of-state bank. If a state contains

more than one check processing region, the state's hold period for in-state checks may be shorter than the federal maximum hold period for nonlocal checks. Accordingly, the state schedule would supersede the federal schedule to the extent that it applies to in-state, nonlocal checks.

The EFA Act also indicates that any state law providing availability in a shorter period of time than required by federal law is applicable to all federally insured institutions in that state, including federally chartered institutions. If a state law provides shorter availability only for deposits in accounts in certain categories of banks, such as commercial banks, the superseding state law continues to apply only to those categories of banks, rather than to all federally insured banks in the state.

### ***Preemption of Inconsistent Law***

Section 229.20(b) provides that other provisions of state laws that are inconsistent with federal law are preempted. State laws requiring disclosure of availability policies for transaction accounts are preempted by the regulation. Preemption does not require a determination of the Federal Reserve Board in order to be effective.

### ***Preemption Standards and Determinations***

The Federal Reserve Board may issue a preemption determination upon the request of an interested party in a state. The determination will only relate to the provisions of Subparts A and B of the regulation.

## **Civil Liability – §229.21**

### ***Statutory Penalties***

Section 229.21(a) sets forth the statutory penalties that can be imposed as a result of a successful individual or class action suit brought for violations of Subpart B of the regulation. Basically, a bank could be held liable for:

- Actual damages;
- Not less than \$100 nor more than \$1,000 in the case of an individual action;
- The lesser of \$500,000 or one percent of the net worth of the bank involved in the case of a class action; and/or
- The costs of the action together with reasonable attorney's fees as determined by the court.

These penalties also apply to provisions of state law that supersede provisions of this regulation such as requirements that funds deposited in accounts at banks be made available more promptly than required by this regulation, but they do not apply to other provisions of state law. (See Commentary to Appendix D, §229.20)
